**Subject:** Re: PLP date reports

<http://www.wisegeek.com/how-big-are-the-states-in-america.htm>

<http://www.pebblepartnership.com/environment>

<http://www.pebblepartnership.com/documents/report-n-terrestrial-wildlife-and-habitats>

Here is some additional information to put the size of the Nushagak/Kvichak Watersheds in perspective. The Pebble prospect is about 58,000 acres (90 sq miles) (not including road and port site). As of May 2010 there are 507,256 (793 sq miles) acres of mining claims on State land surrounding the pebble prospect. (Note there are no mining claims on Native lands but that does not mean these areas do not have mineral potential.) The Nushagak watershed is 14,072 sq miles and the Kvichak is 9,467 sq miles for a total of 23,539 sq miles (15,064,960 acres). Compare that with sizes of the states and some countries: <http://www.wisegeek.com/how-big-are-the-states-in-america.htm>

Subject  
PLP date reports

In addition to the dvds that PLP passed out at the last agency meeting, they have made some data available on their website. As far as I remember its not worth much but it may help us id species we should consider in our report.

Here are some links:

<http://www.pebblepartnership.com/environment>

<http://www.pebblepartnership.com/documents/report-n-terrestrial-wildlife-and-habitats>

Happy browsing!
